## How to select the correct dog shoe size and train your dog to wear it properly.

- Ⓐ If your dog has a medium-sized paw, it is better to err on the bigger side.
- Ⓑ If the shoe does not fit the dog's paw perfectly, choose the shoe that fits the best.
- Ⓒ For dogs that have never worn shoes before, it will take approximately one hour for the dog to become acclimated.  
(dogs that wear shoes for the first time, often try to kick them off or are afraid to move)
- Ⓓ If your dog is wearing shoes for the first time, do not have them wear the shoes for a long time; take them off after approximately one hour of wearing.
- Ⓔ Instead, increase the length of time your dog wears the shoe in gradual increments.
